

No.1

You have four choices for each objective type question as A, B, C and D. The choice which you think is correct, fill the relevant circle in front of that question number on computerized answer sheet. Use marker or pen to fill the circles. Cutting or filling two or more circles will result in zero marks in that question. Attempt as many questions as given in objective type question paper and leave other circles blank.

(MS-Access)

Questions	A	B	C	D
The data in table is entered in:	Design view	Normal view	Data sheet view	Layout view
A database consists of various components called:	Tools	Properties	Entities	Objects
In 3NF, a non-key attributed must not depend on a:	Non-key attribute	Key attribute	Composite key	Sort key
An entity related to insert in an ERD model refer to:	Recursive relationship	One-to-many	Many-to-many	One to one relationship
Insert command is used to insert:	A new table	A new record	A view	Dependencies
Which data model is more flexible?	Network data model	Hierarchical data model	Relational data model	Object data model

(C – Language OR Visual Basic)

(C – Language)

Which character is used to make the end of the string?	\a	\n	\s	\o
The process of sending an argument to a function is called:	Sending	Filtering	Delivering	Passing
While loop is also called:	Conditional loop	And loop	Counter loop	Continuous loop
Which loop structure always executes at least once?	For	while	Do while	Nested
Another term for a computer making a decision is:	Sequential	Repetition	Selection	Iteration
Which programming structure executes program statements in order?	Relation	Decision	Sequence	Repetition
An ampersand before the name of a variable denotes:	Actual value	Variable name	Address	Data type
Which data type is the most appropriate for storing a name?	Float	Int	Char	Long
The .exe file is produced by:	Linker	Loader	Compiler	Interpreter

OR (Visual Basic)

Which returns true if A = 25 and B = 35 ?	A >= B	A > B	A = B	A <> B
Which is not a property of the common controls?	Fore colour	Name	Back colour	Close
While loop is also called:	Conditional loop	Wend loop	Counter loop	Continuous loop
How many times is the test expression of select case evaluated?	-1	0	1	2
In Visual Basic, which keyword is used at starting point of a decision structure?	Loop	For	If	Else
A loop within a loop is called:	Outer loop	Complex loop	Nested loop	Inner loop
An object is composed of:	Properties	Methods	Events	Data
Which data type is the most appropriate for storing a name?	Float	Int	Char	Long
The .exe file is produced by:	Linker	Loader	Compiler	Interpreter
